

COMPETENCY BASED QUESTIONS – STD XII

ZOOLOGY

Suggestions/Remarks

- ❖ The topics given for checking one from Human Health and diseases, evolution, Human Reproduction and Biodiversity.
- ❖ All the Assertion based questions in the above topics are relevant and good.
- ❖ In Set 2 – Human health and disease – Assertion Reasoning questions, answers are not given.
- ❖ Case based questions – Set 2 – Human health and disease showing graph of snake bite admission lacks clarity and has no relation to the questions asked (no interpretation questions from graph).
- ❖ Case based question in the topic – Evolution based on Rat population also lacks clarity and relevance to the questions asked (no interpretation questions from graph).
- ❖ Case based questions on topic – Human reproduction are very good and relevant.
- ❖ All the other questions are ok and are good enough to test the competency skills.
- ❖ MCQ questions of application level, both picture based and source based/direct can be included for the above topics.
